

ANTI CORONAVIRUS MEASURES

TYPIC HOTELS™

SAFETY AND RESPONSIBILITY

Given the extraordinary situation created by Covid, Typic Hotels™ has devised an operational transformation strategy based on the premise of ensuring the maximum safety of Employees & Customers and make them feel safe.

At Typic Hotels™ we have developed a program to deal with the reopening of our hotels and apartments in the post-COVID recovery phase. To do this we have worked closely with our risk prevention team and developed safety, training and maintenance protocols in line with the prescriptions of the competent authorities and WHO standards.

In addition to specifying the protocols and measures for hygiene and disinfection of the spaces and the main operational processes, a significant effort has been and continues to be devoted to training professionals in the situation created by COVID.

To verify the proper compliance with the processes established for the prevention of COVID, a Safety Committee has been created that will continuously review the optimal implementation of the measures.

The actions have been developed in various areas:

- Post COVID Cleaning and Disinfection Plan.
- Occupational Health Recommendations for incorporation into the workplace (corporate offices and hotels), which includes hygienic and organizational measures to guarantee the return to the workplace, the identification of people at risk, the coordination of the relationship with suppliers and third parties, and the management of possible cases of contagion.
- Global post-COVID operations guide, with adaptations of procedures and necessary training for teams.
- Standards adapted to the security required to avoid risks of contagion by COVID in processes such as F&B, Guide to Technical Installations and Post COVID Maintenance.
